Three friends shared a pie. Sammy ate 1/4 of the pie, Grant ate 1/5 of the pie, and Ben ate 1/4 of the pie. How much of the pie is left?

1

Fractions All Arithmetic Operations Diff Denominators (2-steps)

Three friends shared a pizza. Mindy ate 1/3 of the pizza, Oliver ate 2/5 of the pizza, and Kristi ate 1/6 of the pizza. How much of the pizza is left?

2

Fractions All Arithmetic Operations Diff Denominators (2-steps)

Three friends shared a pizza. Mindy ate 1/6 of the pizza, Martha ate 1/6 of the pizza, and Ben ate 3/5 of the pizza. How much of the pizza is left?

3

Fractions All Arithmetic Operations Diff Denominators (2-steps)

Gabriela is making 3 batches of cupcakes. Each batch calls for 14/5 cups of flour. Gabriela has 29/3 cups of flour in the cupboard. How much flour will Gabriela have left after making the cupcakes?

4

Fractions All Arithmetic Operations Diff Denominators (2-steps)

Vianna is making 3 batches of cupcakes. Each batch calls for 7/6 cups of sugar. Vianna has 23/6 cups of sugar in the cupboard. How much sugar will Vianna have left after making the cupcakes?

5

Fractions All Arithmetic Operations Diff Denominators (2-steps)

Ella is making 2 batches of cupcakes. Each batch calls for 11/6 cups of sugar. Ella has 21/4 cups of sugar in the cupboard. How much sugar will Ella have left after making the cupcakes?

6

Fractions All Arithmetic Operations Diff Denominators (2-steps)

Aubrey is filling jars with candy. Aubrey has 13/6 ounces of caramels and 12/5 ounces of chocolates. Each jar will hold total 3/5 ounces of candy (containing caramels, chocolates, or both). How many jars can Aubrey fill?

7

Fractions All Arithmetic Operations Diff Denominators (2-steps)

In order to pass, Angelina must get 3/4 of the items correct on a 60-item quiz in 5 subjects. How many items does she need to get correct in order to pass the quiz in each subject?

8

Fractions All Arithmetic Operations Diff Denominators (2-steps)

During the exam, the students are given 5/ 6 of an hour to complete the test for each subject. If Angelina finished the first subject in 2/ 3 of an hour, how much more time does she have left before starting the second subject? How long is the examination time for all 5 subjects altogether?

9

Fractions All Arithmetic Operations Diff Denominators (2-steps)

Catherine is reading a novel that has 400 pages. She read 1/5 of the total number of pages yesterday and 3/10 of the total number of pages today. How many more pages does she need to read to finish the novel?

10

Fractions All Arithmetic Operations Diff Denominators (2-steps)

There are 1/4 more grade 6 than grade 5 pupils where Mr. Jordan works. If there are 248 students in grade 5, how many grade 6 pupils are there in the school?

11

Fractions All Arithmetic Operations Diff Denominators (2-steps)

Aida works as a teacher's aide for Mr. Jordan. She spent 8 1/3 hours assisting Mr. Jordan, including her lunch break. If her lunch was only 11/12 of an hour, how much time did she spend assisting teacher Jordan?

12

Fractions All Arithmetic Operations Diff Denominators (2-steps)

There are 1/4 more grade 6 than grade 5 pupils where Mr. Jordan works. If there are 248 students in grade 5, how many grade 6 pupils are there in the school?

13

Fractions All Arithmetic Operations Diff Denominators (2-steps)

Mr. Carlo spent 2 1/4 hours checking the test papers of his 54 students from 2 sections in his mathematics course. In minutes, how much time did he spend checking each test paper?

14

Fractions All Arithmetic Operations Diff Denominators (2-steps)

1/8 of a pizza costs 2 dollars. In an hour, 6 1/4 pizzas were sold. How much money was made at the food booth in that hour?
