1

Ava is building a rectangular garden with dimensions 4 meters by 3.5 meters. She wants to put a fence around the garden. If each fence panel is 2.5 meters long, how many panels does she need?

Metric system: Measurement (2-steps)

2

Liam has a swimming pool shaped like a cylinder with a diameter of 4 meters and a height of 1.5 meters. If 1 cubic meter of water fills 1000 liters, how many liters of water does the pool hold when full?

Metric system: Measurement (2-steps)

3

Emma's car travels at a speed of 72 kilometers per hour. If she drives for 2.5 hours without stopping, how far does she travel in kilometers?

Metric system: Measurement (2-steps)

4

Ethan has a rectangular plot of land measuring 50 meters by 30 meters. He wants to plant trees every 2 meters along the length and every 3 meters along the width. How many trees does he need?

Metric system: Measurement (2-steps)

5

Sophia's rectangular room measures 6 meters by 4.5 meters. She wants to install tiles that are 30 centimeters by 30 centimeters. How many tiles does she need?

Metric system: Measurement (2-steps)

6

Jack is painting a cylindrical water tank with a radius of 1.5 meters and a height of 2 meters. If 1 liter of paint covers 3 square meters, how many liters of paint does he need to cover the entire tank?

Metric system: Measurement (2-steps)

7

Olivia's garden is a triangle with a base of 8 meters and a height of 6 meters. She wants to fence around the garden. If each fence panel is 2.5 meters long, how many panels does she need?

Metric system: Measurement (2-steps)

8

Liam is planning to carpet his rectangular room which measures 5 meters by 3.5 meters. If carpet is sold in rolls that are 2 meters wide and he needs to cover the entire floor, how many rolls of carpet does he need?

Metric system: Measurement (2-steps)

9

Emma is making a rectangular cake that measures 40 centimeters by 30 centimeters. If she wants to cover the top with icing and each square centimeter of icing requires 2 grams, how many grams of icing does she need?

Metric system: Measurement (2-steps)

10

Ethan is planning to fence his square garden with a perimeter of 32 meters. If each fence panel is 4 meters long, how many panels does he need?

Metric system: Measurement (2-steps)

11

Sophia wants to fill a cylindrical vase with water. The vase has a diameter of 20 centimeters and a height of 30 centimeters. If 1 liter of water is 1000 cubic centimeters, how many liters of water does the vase hold when full?

Metric system: Measurement (2-steps)

12

Jack's rectangular swimming pool measures 12 meters by 6 meters. He wants to tile the pool floor with square tiles that are 50 centimeters by 50 centimeters. How many tiles does he need?

Metric system: Measurement (2-steps)

13

Emma is planning to tile her bathroom floor, which measures 3.5 meters by 2.8 meters. If each square tile is 30 centimeters by 30 centimeters, how many tiles does she need?

Metric system: Measurement (2-steps)

14

Sophia is designing a rectangular garden with a length of 8 meters and a width of 5 meters. She wants to plant flowers along the perimeter of the garden, leaving a pathway that is 1 meter wide inside the garden. How many meters of flowers does she need to plant?

Metric system: Measurement (2-steps)

15

Jack is constructing a triangular roof for his house. The base of the triangle is 12 meters and the height is 8 meters. If roofing material costs $5 per square meter, how much will it cost to roof his house?

Metric system: Measurement (2-steps)
