1

A triangular traffic sign has sides of 75 cm. If its height is 65 mm, what is its area in square meters?

Area (2-steps)

2

A square tile measures 25 cm on each side. What is its area in square meters?

Area (2-steps)

3

A regular pentagon-shaped garden has sides of 3.5 m and an apothem (distance from center to midpoint of any side) of 240 cm. Calculate its area in square meters.

Area (2-steps)

4

A hexagonal room in a museum has sides of 400 cm and an apothem of 3.46 m. What is the room's area in square meters?

Area (2-steps)

5

A regular heptagon-shaped logo has sides of 15 mm and an apothem of 1.84 cm. Find its area in square centimeters.

Area (2-steps)

An octagonal stop sign has sides of 30 cm and an apothem of 0.362 m. Calculate its area in square decimeters.

6

Area (2-steps)

A nonagon-shaped playground has sides of 5 m and an apothem of 575 cm. What is its area in square meters?

7

Area (2-steps)

A decagonal pool has sides of 2.5 m and an apothem of 385 cm. Find its area in square meters.

8

Area (2-steps)

A circular pizza has a diameter of 35 cm. Calculate its area in square decimeters. (Use $\pi = 3.14$)

9

Area (2-steps)

A parallelogram-shaped banner has a base of 1.8 m and a height of 90 cm. Calculate its area in square decimeters.

10

Area (2-steps)

A rectangular field is 0.25 km long and 180 m wide. What is its area in hectares? (1 hectare = 10,000 m²)

11

Area (2-steps)

A rhombus-shaped kite has diagonals of 80 cm and 0.6 m. What is its area in square centimeters?

12

Area (2-steps)

A trapezoid-shaped garden bed has parallel sides of 3 m and 4.5 m, with a height of 250 cm. Find its area in square meters.

13

Area (2-steps)

An equilateral triangle has sides of 12 dm. If its height is 10.39 dm, what is its area in square meters?

14

Area (2-steps)

A circular running track has a radius of 50 m. What is the area inside the track in hectares? (Use π = 3.14, 1 hectare = 10,000 m²)

15

Area (2-steps)
