1

A rectangular prism has a length of 8 cm, a width of 5 cm, and a height of 10 cm. What is its volume?

Volume (1-step)

2

A box is in the shape of a rectangular prism with dimensions 12 m by 7 m by 4 m. Calculate the volume of the box.

Volume (1-step)

3

A triangular prism has a base area of 15 square inches and a height of 9 inches. Find the volume of the prism.

Volume (1-step)

4

The base of a triangular prism is a triangle with a base of 6 cm and a height of 4 cm. The height of the prism is 10 cm. What is the volume of the prism?

Volume (1-step)

5

A hexagonal prism has a base area of 20 square meters and a height of 15 meters. What is the volume of the prism?

Volume (1-step)

The base of a hexagonal prism has a side length of 3 cm and an apothem of 2.6 cm. The height of the prism is 12 cm. Find the volume of the prism.

6

Volume (1-step)

A cylinder has a radius of 5 cm and a height of 10 cm. What is the volume of the cylinder?

7

Volume (1-step)

The diameter of a cylindrical tank is 8 meters and its height is 12 meters. Calculate the volume of the tank.

8

Volume (1-step)

A square-based pyramid has a base side length of 6 meters and a height of 9 meters. Find the volume of the pyramid.

9

Volume (1-step)

The base area of a square-based pyramid is 25 square centimeters, and its height is 10 centimeters. What is the volume of the pyramid?

10

Volume (1-step)

A cone has a base radius of 7 inches and a height of 15 inches. Find the volume of the cone.

11

Volume (1-step)

The diameter of the base of a cone is 14 cm and its height is 20 cm. What is the volume of the cone?

12

Volume (1-step)

A sphere has a radius of 4 meters. Calculate the volume of the sphere.

13

Volume (1-step)

The diameter of a spherical water tank is 10 feet. What is the volume of the tank?

14

Volume (1-step)

A basketball has a radius of 12 inches. Find the volume of the basketball.
