VALENCIA montessori SCHOOL

Easter bonnet construction

This document is going to help you to make your own Easter bonnet. We will see the materials that we can use and some ideas for you to run free your imagination.

What materials can I use?

The two materias you will need to start are:

- Sccissors
- Glue or staple machine or any kind of tape.

Now, let´s look for a material to build the hat:

> big cardboard
> bricks (milk, juices)
> cardboard packages (cookies, cereals...)
> egg cups
> plastic containers
> cans (beverages)
...

These materials can be mostly found in the recycling bins that every family keeps at home.

Let´s look for materials to decorate the hat:

> rope, cord, thread
> elastic bands
> wool
> paint or colors (markers, color pencils, crayons...)
> fabric, nets
> cotton
> bottle caps
...

How can I build my hat?

The next pages are going to show you some examples of hat designs.
Each of them explain the material you need and the steps to follow. Then, you will need to add all kind of fun and crazy things on it!

Of course, you don't have to follow any of these designs if you have your own great idea.
In that case just go for it!

Have fun!

This can be useful...

The first thing before using any dirty material from the recycle bin is to clean them.
Take them to the kitchen sink and wash them with water and a bit of soap.
Don't wash any cardboard if it´s not plastificad!

How to clean and prepare the bricks?

For this process you will need scissors.

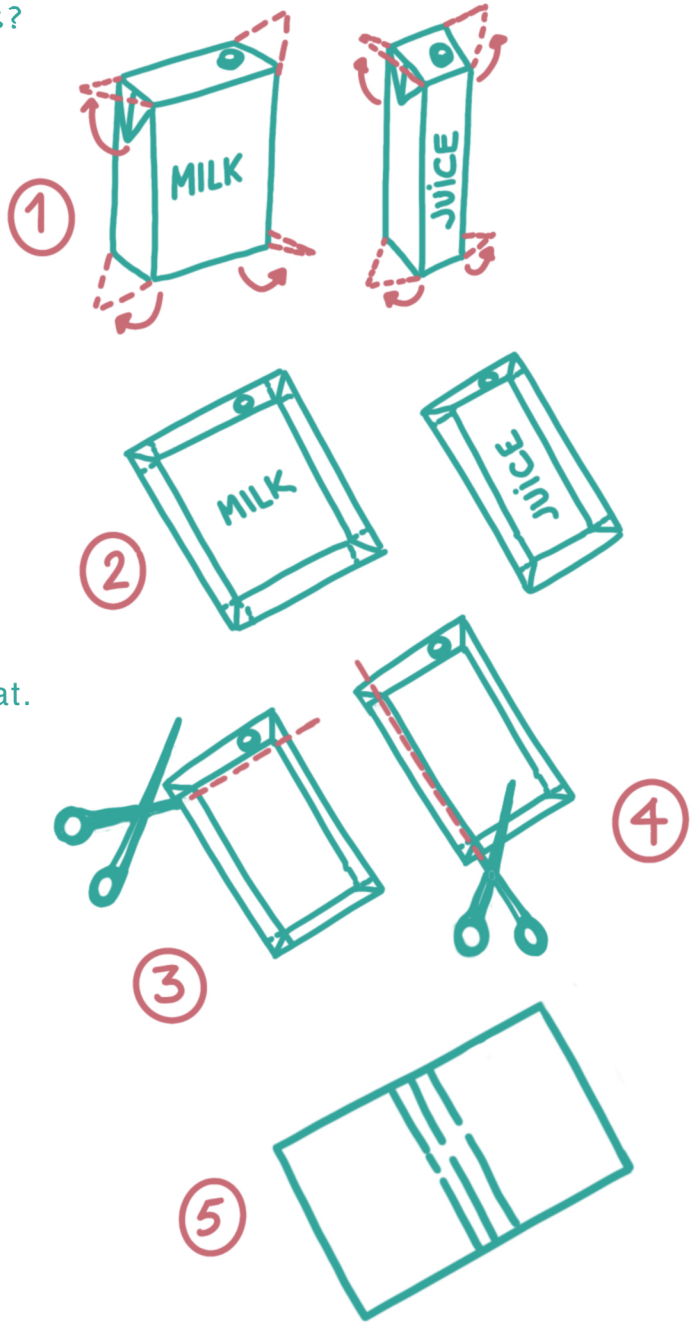

1. Open with your hands all the folded corners of the brick.

2. Make it flat pressing both sides to the center.

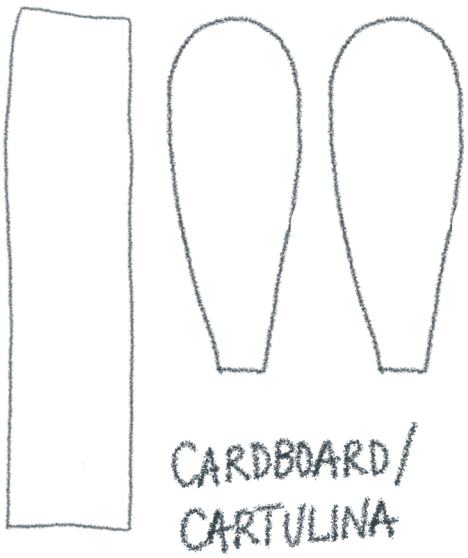

3. With the scissors cut the top and the bottom of the container.

4. With the scissors cut the long side of the container.

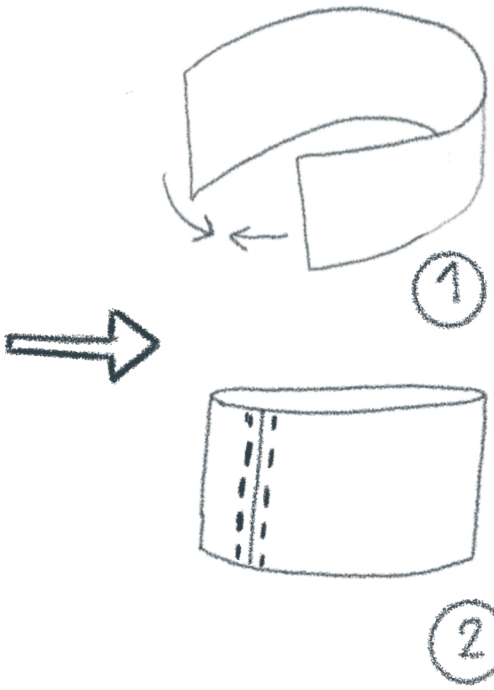

5. Now you have a big rectangle of cardboard that you can use to built your hat. Wash it and leave it to dry.
