THE ART OF QUILLING

QUILLING

Quilling is an art form that involves the use of strips of paper that are rolled, looped or curled and then glued together to create decorative designs.
Although its exact origins are a mystery, the art of quilling is thought to have originated in Ancient Egypt. It was also practiced during Renaissance in France and Italy and later in England during the18th century. Today is a decorative craft that is practiced all over the world.

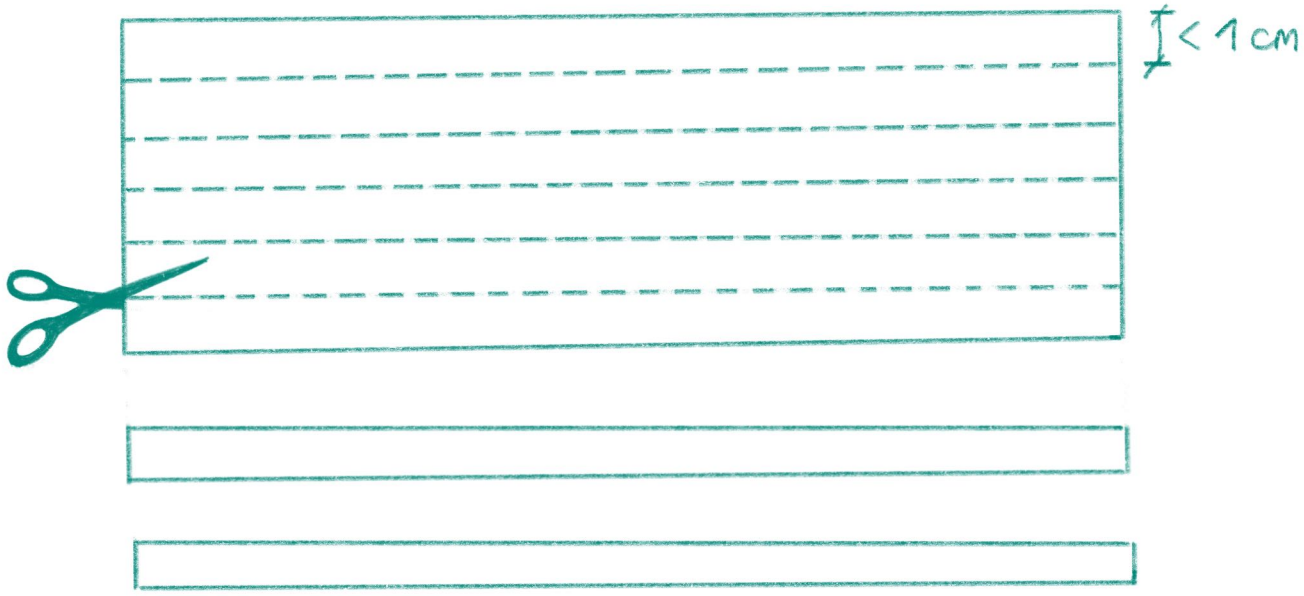

THE PROCESS OF QUILLING

The short list of materials we need are:

- Scissors
- Color paper
- Glue
- A tool with which to roll the paper
- And... a lot of patience :)

Paper strips

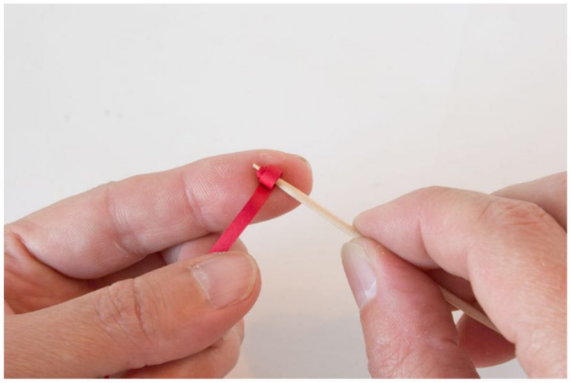

- Look for color paper. Normal weight or a little bit thicker but not to much, otherwise gets more complicated to work with it.
- Draw the lines as long as you can. using a ruler and a pencil.
- The separation between lines shouldn't be more than 1 cm.
- Using the scissors cut the strips of paper by the lines you drew.
- *You have to be very careful to cut the paper very straight.*

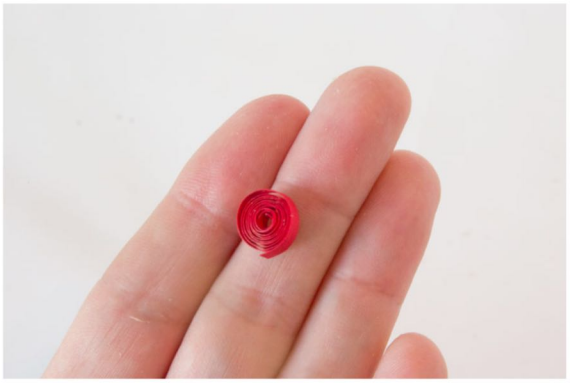

Tool to roll

To roll the strips of paper we can use any utensil with round shape that is thinner than a pencil: a bamboo skewer, a chopstick, a round toothpick, a crochet hook, a screwdriver, a nail...etc.

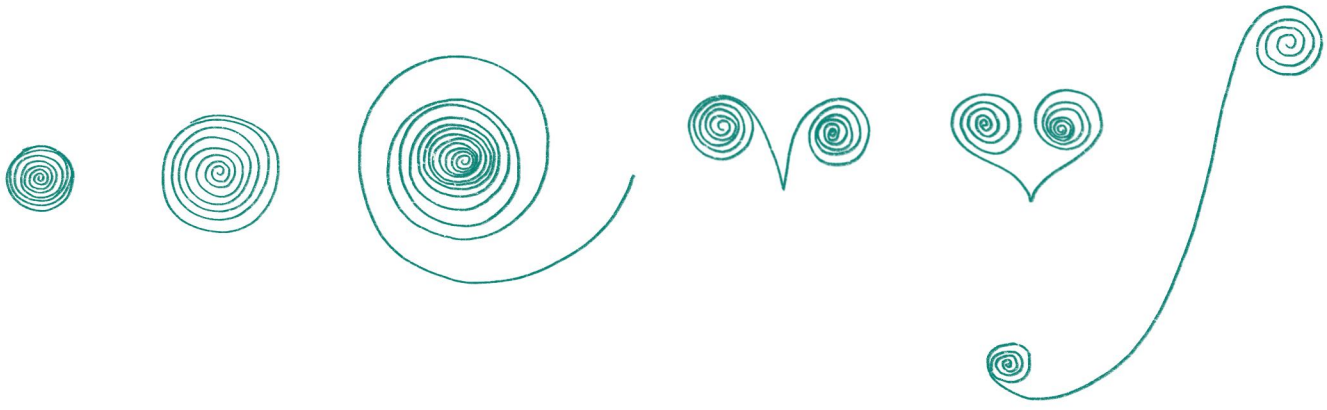

1. Take one of the ends of the strip and place it over your tool.
2. Holding the paper start turning the tool so the strip take the shape of a circle.
3. Keep rolling the stripe till the other end.
At this point you should have the glue ready with a little brush (or something similar)
5. Apply an small quantity of glue at the end of the strip so it doesn't get unrolled once you release it from the tool and your hands.
6. Leave it dry while you start rolling another strip.

Roll shapes

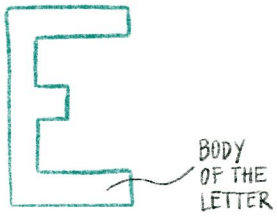

There are many different shapes that we can give to our paper rolls, but here we are just going to see some of them:

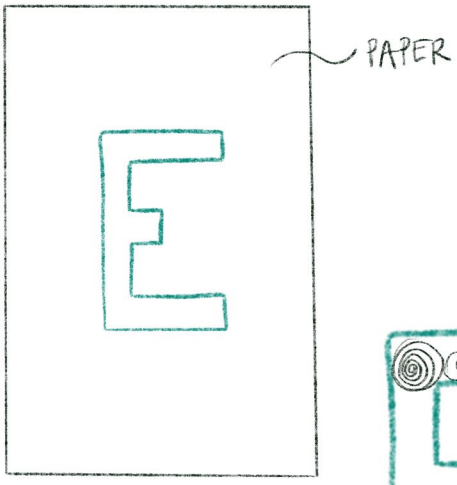

HOW TO APPLY THIS PAPER ROLLS

Quilling can be apply for any kind of project that we can imagine.
In this assignment we want to apply it to create a ***CAPITAL LETTER.***

1. Choose a letter:
Could be the letter of your name, the name of someone you love, the lettter of your favorite animal, the letter of the place where you leave or the place you were born... or any other letter you decide to choose.

2. Draw the letter:
The letter has to have “body”, this means that it is not only a line but a double line with space inside.
The size of the letter can be the half of a printing size paper or even the whole size of that paper.
You can use a white paper or color paper of a normal size. A piece of cardboard can also be an option.

3. Glue the rolls creating a design:
Apply glue in one side of the roll and place it in the part of the letter that you decide following your design.
Try to combine different kinds of roll shapes and colors.

Have fun!!

Here some examples of quilling in the shape of a capital letter
