1

I live attached to rocks under water with may others like myself. My body is full of holes. Water brings food through my holes and in this way I am nourished. When I am dead you can use me to wash yourself.

What do you think I am?

2

I am beautiful! I look like a bride with a huge veil that keeps me afloat in the middle of the sea. I look like one animal but I am really made up of thousands of little animals which have grouped themselves together to form "organs". If you see me, be careful not to touch me because I sting like a nettle!
Do you know what I am called?

3

I live in trees where I find all that is necessary to feed and defend myself. I have long arms and legs with hands and a prehensile tail that I can use as an extra hand. For this reason I can swing and jump easily from one tree to another. I know how to play and do somersaults, too.
Can you guess who I am?

4

I choose to live by night because I don't like the light. I am not blind but my eyes are very tiny. I live underground in burrows with long tunnels that I dig out with my strong, curved front feet. I feed on insects that I find in the ground.

Can you guess who I am?

5

I have a long, beautiful mane and tawny-brown skin. I range over plains, deserts or hilly country. I usually sleep during the day and roam around at night. The female of my species does the hunting. The male of my species is called the king of the jungle. I am very strong and I can emit a loud roar.
Do you know what I am called?

6

I am a great help to anyone who cultivates the land. I cut long tunnels in the soil and leave the soil lighter and better than before. That makes it easier for things to grow. People who go fishing like to use me for bait. When it rains I often crawl out onto sidewalks where you can see me. Be careful not to step on me. Remember how much help I am to the soil.
Who am I?

7

I am very plentiful in all seas and particularly along the Atlantic shoreline where I bury myself in holes along the beach. Sometimes you can see my holes at low tide, or collect my empty shells. I am very good for making soups and chowders.

What is my name?

8

I often live in the cold, northern seas. I am from one of the oldest families of bony fish in existence. I have four barbells under my mouth that I use to comb the muddy bottoms of the rivers. In the spring I swim upstream in a river to deposit my eggs. Many of my kind especially like the Volga River, which is found in Russia. People collect my eggs and sell them as caviar.
Do you know what I am called?

9

I live only in water and have changed little in millions of years. My fins are large and wing-like and I have gill slits on each side of my head. Instead of bones, I have cartilage in my body. I have many rows of teeth and when some fall out, I keep growing more. I am a very voracious eater with sharp teeth and both man and animal fear me.

Do you know who I am?

10

These animals are among the largest living rodents in the world. They have thick fur, webbed feet and flattened, scale-covered tails. With powerful jaws and strong teeth, they fell trees in order to build homes and dams, often changing their environment in ways few other animals can.

Who am I?

11

Do you know my name?

13

He is the adult male chicken. Larger, usually more brightly colored, and have larger combs on top of their heads compared to hens. Chickens can fly but because they are heavy, they can only go about 60 meters (200 ft).

Who am I?

14

Many people believe I am a fish, but I am really a mammal. In fact, I am the largest animal in the world and can weigh as much as 10 tons or more. I have a very large mouth and my nostrils are "blow holes" on top of my head. I can hold my breath for up to an hour under water but then I must surface and blow warm, moist air out through my blow holes and breathe in some fresh air. I communicate with others of my kind by singing under water.

What do you think I am?

15

I have a special front pouch in which I carry my young. I can sit on my hid legs and tail. Instead of walking, I move by jumping and leaping with my strong hind legs. I am usually found in Australia.

What am I called?

16

I live in the arctic waters with many of my companions, but really I am a mammal. My fur is covered with oil so that water can't penetrate my body. When I go in the water I can close my eyes and nostrils. It is much easier for me to swim in water than it is for me to move about on land. I am smart enough to be trained to entertain people at the zoo and at the circus.
What am I called?

17

During the day I sleep and will awake only after sundown to fly away in search of food. My eyesight is poor but I have special radar that helps me to locate or avoid objects. I have wings, yet I am not a bird. I feed my young milk so I am a mammal. When I sleep I suspend myself from rocks and rafters by holding on with my toes. During the winter I withdraw into caves and pass the cold time by sleeping.

What is my name?

18

I want you to know that my life is complicated. For three years I live underground in the form of a little worm eating the roots of plants. Then I construct a case and live in it for a while. And then, finally, I am born a second time with beautiful ruddy wings and I fly around trees during the month of May.

What am I called?

19

I grow very large, for a fish. Sometimes I can be as long as three meters. I live in temperate and tropical seas. When I am caught I am put into small cans and shipped to grocery stores. People like to eat me.

Who am I?

30

I have a strong shell that covers my whole body. This carapace has openings for my head, legs and tail, which are usually covered with scales. I nourish myself with large quantities of insects as well as land and aquatic plants. I have no teeth in my mouth, but my jaws cut like scissors.

Do you know what I am called?

31

My body is protected by a very hard shell. I have two big claws and eight legs that can be used for walking forwards and backwards. If one of my legs is lost, I can grow another one. Many people like to catch me because I am good to eat.

What am I called?

32

My skin is covered with leathery scales that are horny and ridged along the back. My head is long and flat and I have strong jaws and many, sharp teeth. My legs are short and sturdy and allow me to move rapidly on land. In the water I use my massive tail as a rudder when I swim. I live in warm, moist climates. When the rivers are dry, I hibernate.

Who am I?

33

When I am born I start out as a maggot living on decaying things. Then, when I become an insect with wings, I fly around, often carrying germs with me. I have a vicious bite that is very annoying to people. Have I ever bitten you?

Do you know my name?

34

I have two magnificent, transparent wings, a slender, brilliantly colored body; a large, mobile head, and 2 huge compound eyes, with ten thousand facets each. I fly very fast with bursts of speed reaching 14 meters per second. I like to fly over ponds and pools and nourish myself with insects. Sometimes you can see me in your backyard. You will be glad to know I eat lots of mosquitoes.

Who am I?

35

My color is brown. I have lived on this earth for millions of years. In the daytime I hide and at night I come out in search of food. The best place to find me is in the kitchen after dark. Wherever I am, people try to destroy me, but I am still here.

Do you know my name?

36

I am a migratory bird that goes between Europe and Africa in search of warmer weather. I feed on insects that live in water and for this reason I have a long, tapering bill and long, slender legs. I build my nest very high up in tree tops or chimney tops near water.

Do you know who I am?

37

I am the largest living bird; however, I cannot fly. I have very small wings but my large and strong legs make me a very fast runner. I have only two toes on each foot. My legs and neck are very long, making me the tallest of all birds. My feathers are called plumes and are highly prized by human beings.

Who am I?

38

I have long, pointed wings that make me an excellent flyer. I make a special sound called a 'coo'. I eat grains but nourish my young with a special liquid food that I prepare in my crop, a pouch that stores and prepares food for digestion in grain eating birds.

Do you know what I am called?

39

I am an unusual animal because I resemble both mammals and birds. I give milk to my young like a mammal and have fur like a beaver. I also have a wide bill and webbed feet like a duck. I live near water in Australia and Tasmania.

Who am I?

40

I belong to the family of web-footed animals because my three front toes are connected by a membrane. My webbed feet make me a good swimmer. Above my tail is an oil sack. I use my bill to spread oil on my feathers to keep them dry. The male of my species has beautifully colored feathers. The females are usually dull in color so they are not easily seen when they are keeping their eggs warm.

Who could I be?

41

I live with many, many others like myself in a big hive that has many little compartments. We have a very well organized society. We nourish ourselves with the nectar of flowers and with it we prepare our special food. You like it, too. Our food is very, very sweet.

Can you guess who I am?

42

I am a bird that has four toes, two facing forwards and two facing backwards. These toes help me to cling to tree trunks. I also have a strong, pointed beak so that I can dig out insect larvae from tree trunks. When I dig I make a loud 'rat-a-tat-tat' sound.

Do you know who I am?

43

I have four stages in my development. After I hatch from an egg, I am a caterpillar eating leaves, fruits, flowers and seeds. Later, I construct a little case with two walls, which is called a cocoon. When I am inside the cocoon I am called a pupa. From this I emerge as a beautiful, new creature with four magnificent wings. You have probably seen many like me flying around in your neighborhood.

What am I?

44

I am a large mammal who lives in the water along the coast of India where I nourish myself on algae. Do you know the legends of the mermaids whose singing caused sailors to shipwreck? Perhaps the ancients were referring to me because at a distance my upper body could look human and my lower body resembles that of a fish. The sound that I emit is like a song. I appear only at night. Some people call me a sea cow or a manatee.

Can you think of my name?

45

I belong to the family of edentates which, instead of teeth, have long snouts and long, sticky tongues. I nourish myself only with ants, which I catch with my long, sticky tongue. I am found in Africa and South America.

Do you know who I am?

46

I am a fish with a body similar to an eel. I live in swamps and lakes in the hottest parts of Africa. I can grow up to three feet long and I eat meat. During the dry season, I live buried in the mud. There I breathe by means of a swim bladder which functions like the lungs of human beings.
